DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 11-13, 16, 18, 19 and 21-23, drawn to a polynucleotide, chimeric gene, host cell, virus, expression cassette and first method of using.

Group II, claim(s) 10, 17 and 24, drawn to flavonoid biosynthetic enzyme polypeptides.

Group III, claim(s) 14-15, drawn to a second method of using the polynucleotide.

Group IV, claim(s) 20, drawn to a third method of using the polynucleotide.

In addition to an election of one of inventions I-IV listed above, in accordance with 37 CFR 1.499, applicant is required to elect one of the following inventions A-C to which the claims must be restricted.

Group A, drawn to a polynucleotide of SEQ ID NO: 1 or corresponding polypeptide of SEQ ID NO: 2.

Group B, drawn to a polynucleotide of SEQ ID NO: 3 or corresponding polypeptide of SEQ ID NO: 4.

Art Unit: 1638

Group C, drawn to a polynucleotide encoding SEQ ID NO: 6 or corresponding polypeptide of SEQ ID NO: 6.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: These groups lack or corresponding special technical feature. Group I is a polynucleotide and first method of using the polynucleotide which is structurally and functionally divergent from the polypeptide of Group II. Moreover, where multiple methods of use of a product are claimed, Applicant is entitled unity of invention between the product and the first claimed process. See 37 CFR 1.475(d).

3. The inventions listed as Groups A-C do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Though each of the listed polynucleotides is asserted to encode a plant flavonoid biosynthetic enzyme polypeptide, each of the polynucleotides is structurally divergent and each of the polynucleotides encodes a divergent polypeptide.

Accordingly, the recited polynucleotides lack a common special technical feature.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). In this case, Applicant is required to elect one of groups I-IV and one of groups A-C in response to this requirement.

Art Unit: 1638

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Papers relating to this application may be submitted to Technology Sector 1 by facsimile transmission. Papers should be faxed to Crystal Mall 1, Art Unit 1638, using fax number (703) 308-4242. All Technology Sector 1 fax machines are available to receive transmissions 24 hrs/day, 7 days/wk.
